

New Leases Signed

Thanks to club member Bob Breakiron and our president Fred Lamolinara, the club has just signed 2 new leases giving us access to 168 acres of additional riding area. The area is south of the Ace's Hill area, and will increase our riding area to more than 680 acres of property. Our work crew has begun clearing out the existing trails and laying out new ones around the perimeter of the property. So far we are looking at 3.2 miles of additional trails bringing our total to over 26 miles. The crew expects to reach 30 miles eventually with the new area.

Trail Clearing Begins

This property is not open yet. If you want an early look, come out and help the work crew. Once the property is "open" for riders, it will remain a "members only" area. It will be closed for the Open Houses and you are asked not to take your guests on the property.

Schedule of Work

It will be several months before this area is open to members. First the new trails must be marked out around the existing trees and rocks. Then we will hire heavy equipment to ensure a safe ride. The new trails must be mapped and numbered and signs will be made and installed. Please respect the work being done by the work crew and help out if you can.
